Choose the best response for each question. Then select **Check your answers**.

1. Which cloud service type is most suited to a lift and shift migration from an on-premises datacenter to a cloud deployment? *

Infrastructure as a Service (IaaS)

✓ With an IaaS service type, you can approximate your on-premises environment, making a lift-and-shift transition to the cloud relatively straightforward.

Platform as a Service (PaaS)

Software as a Service (SaaS)

2. What type of cloud service type would a Finance and Expense tracking solution typically be in? *

Infrastructure as a Service (IaaS)

Platform as a Service (PaaS)

Software as a Service (SaaS)

✓ SaaS provides access to software solutions, such as finance and expense tracking, email, or ticketing systems.
